Devops Engineer

DevOps Engineer with 4+ years of hands-on experience supporting production applications on AWS and Linux-based environments. Strong focus on CI/CD automation, containerized deployments, monitoring, and infrastructure reliability. Experienced in application-side Kubernetes deployments, Docker-based workflows, and EC2-centric AWS architectures, with emphasis on cost optimization, security hardening, and operational stability.

WORK EXPERIENCE

Ventura Securities Ltd • Thane, Mumbai

November 2024 - Present

DEVOPS ENGINEER

- Owned Ubuntu Linux production servers, managing high-availability deployments to maintain 99.9% system uptime and operational stability.
- Configured and maintained NGINX reverse proxies with TLS 1.3, securing traffic routing across multiple critical production services.
- Implemented centralized logging and monitoring frameworks using Prometheus, Grafana, and Loki, improving visibility and reducing troubleshooting time by 50%.
- Designed and implemented robust CI/CD pipelines via Jenkins and GitHub Actions, achieving fully automated, zero-touch releases and eliminating manual intervention.
- Automated complex infrastructure and daily operational tasks using Python and Shell scripting, saving 10+ manual engineering hours weekly.
- Actively owned production incident management, troubleshooting infrastructure bottlenecks to restore services with minimal downtime.
- Managed scalable EC2 workloads, IAM roles, ALB, ASG, and RDS while conducting cloud resource audits that slashed AWS spend by 50%.
- Deployed containerized microservices using Kubernetes manifests (Deployments, Services, ConfigMaps) and managed environment-specific configs via Helm charts.

BNP Paribas India Solutions Pvt. Ltd • Mumbai

July 2022 - September 2024

DEVOPS ENGINEER

- CI/CD & Process Automation: Engineered robust Jenkins pipelines from scratch using Maven, accelerating developer release velocity by 35% and reclaiming 6+ engineering hours weekly via automated Python/Bash infrastructure scripts.
- DevSecOps & Security Enforcement: Spearheaded pipeline security by embedding SonarQube quality gates and Fortify static analysis scans, eliminating 98% of critical vulnerabilities before deployment across 40+ microservices.
- Container & Artifact Optimization: Authored multi-stage Dockerfiles that slashed container image sizes by 60%, while managing over 5,000+ dependencies within Nexus/Artifactory at 99.9% availability.
- Git Governance & Version Control: Orchestrated Git and Bitbucket strategies for 35+ engineers, establishing strict Gitflow branching policies that reduced code integration conflicts by 45%.
- Incident Management & RCA: Headed deep-dive production incident replications and system log analyses, authoring detailed Root Cause Analysis (RCA) documentation that reduced MTTR by 40%.
- Used Nexus /Artifactory for artifact management ,Performed security checks for vulnerabilities on source code using fortify scans.

EDUCATION

Masters in Computer Applications in Computer Science

Bharati Vidyapeeth's Institute of Management and Information Technology • Navi Mumbai •
GPA: 9.33 / 10.00

January 2022

Secured TFWS Scholarship Seat based on my Ranking in MHT-CET

Bachelor's in Computer Science

University of Mumbai • GPA: 9.08 / 10.00

CERTIFICATIONS

DevOps on AWS

Coursera

January 2024

AWS Cloud Solutions Architect

Coursera

PROJECTS

Ventura Retail Trading Platform

January 2026 - March 2026

Ventura Securities Ltd

- **Secure Traffic Engineering:** Configured high-performance NGINX reverse proxies with TLS 1.3 to safely route 10M+ daily high-frequency financial transactions, reducing handshake latency by 25% while securing sensitive market data feeds.
- **Proactive Observability:** Engineered a centralized observability network using Prometheus and Grafana, establishing critical threshold alerts that preemptively mitigated 92% of server performance bottlenecks before they impacted users.
- **High-Availability Deployment:** Managed automated CI/CD pipelines to ensure 99.99% uptime and achieve true zero-downtime rolling deployments for the core retail trading application ecosystem.
- **Runtime Optimization:** Structured containerized application runtimes by writing secure, multi-stage Dockerfiles that slashed average image sizes by 55% and accelerated pipeline build speeds by 12 minutes.

SKILLS

- **AWS:** ALB, API Gateway, ASG, CloudWatch, EBS, EC2, IAM, Lambda, RDS, S3
- **Programming Languages:** Bash, Python
- **CI/CD Tool:** Github Actions, Jenkins
- **Container Management Tool:** Kubernetes
- **Containerization Tool:** Docker
